We're Here To Help

To find out more about our Commercial range of products please visit our website at www.richardburbidge.com or to be put in contact with an area sales manager please call +44 (0) 1691 678268.

DECKPLANNER™

This is the unique and easy way to plan your balustrade requirements for external areas such as decks and balconies. DECKPLANNER™ calculates all the parts you require by asking a series of questions such as strength category, range and spindle or panel design you wish to use.

FUSION® Commercial Outdoor Balustrade Range
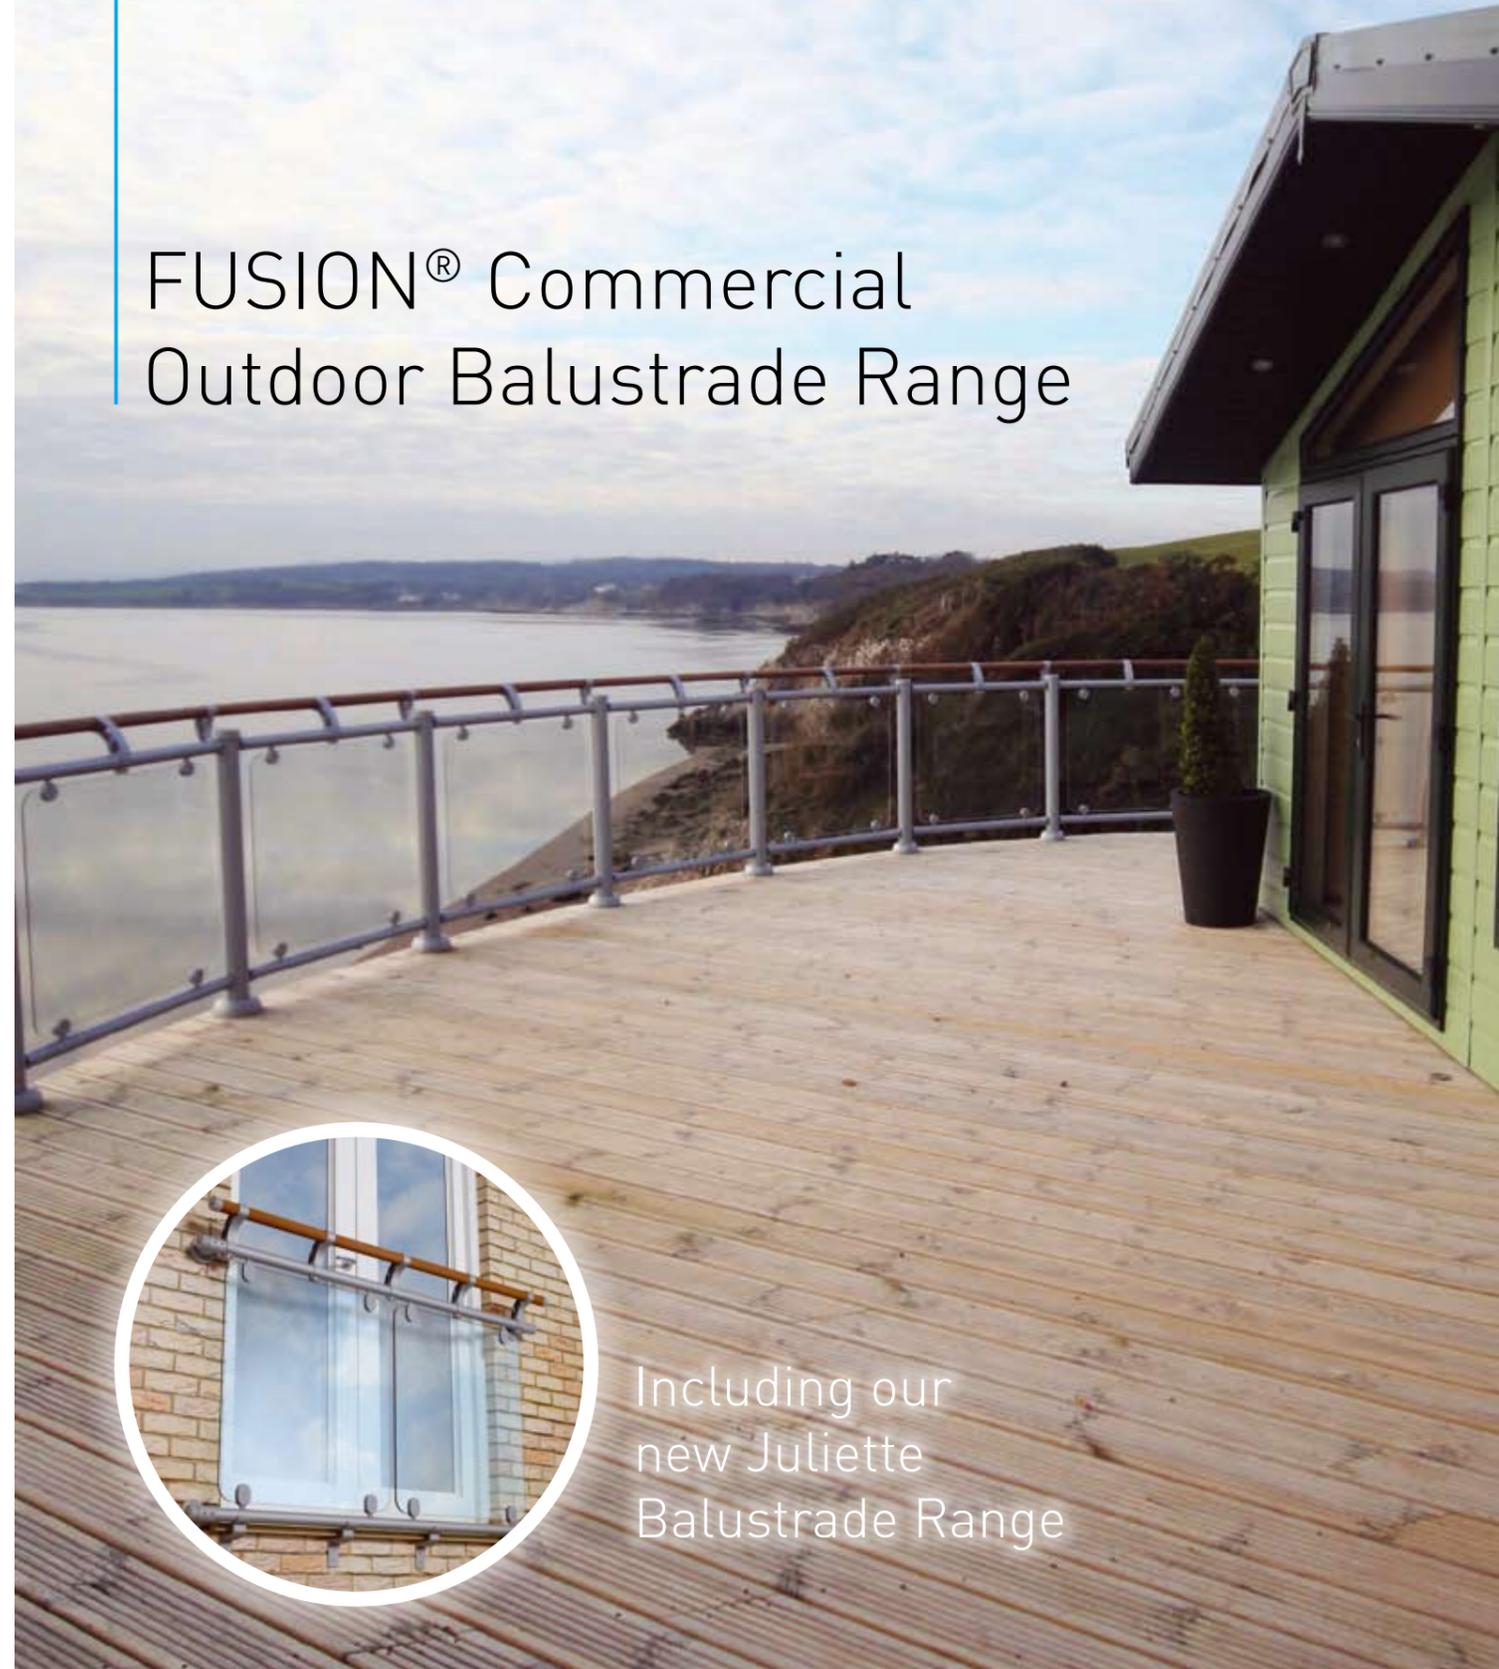

Including our new Juliette Balustrade Range

Richard Burbidge

> We were drawn to the FUSION® Commercial range because of its instant aesthetic appeal and the glass system really stood out, as the panels enable holiday home owners to take full advantage of the spectacular views.
>
> We have sold all three plots, as the finished look is so impressive and the real added bonus was the ease of installation.
> **Michael Holgate, Managing Director Holgates Holiday Park**

Balcony Range

The Richard Burbidge range of commercial outdoor balustrade offers flexible and innovative systems that are suitable for heavy and light commercial situations, and elevated domestic decks and balconies.

FUSION® Commercial takes a strong minimalist metal frame and incorporates a range of timber or glass panels and baluster options, perfect for high-level balconies, restaurants or bars.

Tested to British standards for strength and quality, this balustrade system is designed to be used in areas where people may congregate, and areas with tables or fixed seating, but which are not susceptible to overcrowding. This makes it a perfect solution not only for bars, restaurants and outdoor dining areas, but also for high level decks and balconies in the home environment.

For further information on the range, our technical support and other services we offer please use the contact details provided on the back of this literature.

FUSION®
distinctive by design

The combination of timber, aluminium and glass creates a stunning outdoor feature that can be used with most hard landscaping surfaces including timber decking, composite decking and concrete.

Juliette Option

Ideal for apartments and townhouses, the new Juliette system offers modern styling plus flexibility of design and installation, without bespoke costs and lead times.

Based on FUSION®'s popular combination of metal, timber and glass, the new Juliette system features different sized glass panels and a range of handrail options.

For an alternative look, the system can be installed with a metal handrail in place of the timber one or without any additional handrail, thus utilising the extra glass panel option.

The easy-to-fit system is assembled into one piece that can then be offered up to the wall and secured using specially designed fixing brackets, helping to save time on site.

The Juliette system has been tested by FIRA to resist loadings of 0.74kN/m in line with Building Regulations.
